BC Care Providers Association - Special Members Benefit

The Healthcare Division of Points West along with our partner Shaw Business Solutions are pleased to provide a WiFi-enabled, location based, staff assist solution to the BCCPA membership at a discounted price. The Points West/Shaw partnership provides an end to end solution inclusive of hardware, installation and staff training, for a minimal investment.

The location based Staff Assist solution consists of a quantity of repeaters that receive transmissions from small staff issued tags. When a nurse or care aid requires assistance or when resident aggression escalates, the care provider simply presses the tag and a silent alert is sent to co-workers or a code white team for intervention/assistance. A cloud-based dashboard is also provided as part of the basic system and includes activity reports and usage stats. Features include:

- Single point of contact for program offering including a dedicated Shaw Business Manager
- Cost effective solution for RFID staff assist technology and facility WiFi deployment
- Location based RFID deployment also supports resident-issued tags, for those facilities with traditional nurse call systems
- No annual fees, licensing requirements
- Adaption of solution helps to minimize risk to workers (Occupational Health and Safety Regulation (4.29.b))

Base system components include:

10 ea. RFID repeaters	12 Tags/pendants	Dashboard/software
8 hrs. Installation labor	2 hrs. Training	2 hrs. Consultation/site evaluation
Non-BC Care Providers Association members - \$14,995.00 plus applicable taxes		
BC Care Providers Association members - \$7,995.00 plus applicable taxes		

As Long Term Care facilities differ in size and magnitude, we have included a sufficient quantity of equipment for an average sized facility. Add-on repeaters and tags can be purchased through this program at membership costs. Call Brent @ 250.861.5424 or 800.761.7928 for information or email at brent@pointswestav.com
